

Arborist First Aid & CPR Certification Workshop

Tuesday Feb 17, 2026

9:00AM – 5:00PM

RBC Place London ON

Registration opens 8:30AM

Lunch will be provided around noon. Morning coffee will be provided.

7.0 CEUs available.

Topics covered

This course meets MOL and WSIB requirements and you will earn your First Aid CPR Certification upon completion.

But this is MORE than your usual First Aid & CPR course! Isaac and Luke will focus on arborist-specific scenarios, providing targeted knowledge and skills to prepare participants for responding effectively to medical emergencies in the field before professional medical help arrives.

You'll learn to:

1. Recognize common arborist-related injuries and medical emergencies.
2. Apply immediate care techniques tailored to injuries such as severe bleeding (i.e. chainsaw lacerations), impalements, falls, struck-bys and crush injuries.
3. Demonstrate effective bleeding control techniques including tourniquet use and wound packing.
4. Discuss considerations for patient access and packaging in tree and aerial rescue scenarios.
5. Discuss emergency planning, communication, and coordination with local Fire & EMS.

Do you want to:

- *Gain arborist-specific first aid knowledge beyond generic workplace safety?*
- *Learn life-saving interventions that can be applied immediately on the job site?*
- *Enhance personal safety and crew readiness?*
- *Increase confidence in managing high-stress emergency situations?*

Then this is the course for you!

Speaker

Isaac Allin

Isaac Allin, an experienced Arborist with over 15 years in the industry and Fulltime Firefighter and Rescue Technician, will deliver this workshop, combining technical knowledge of tree work with real-world emergency response expertise. Isaac has been a full-time Firefighter since 2023 and an ISA Certified Arborist since 2013. On his off-days, Isaac works as a contract climber doing tree work, rope access work, at height safety and rigging.
